## EL DORADO COUNTY'S ONLY DAILY NEWSPAPER

VOLUME XLVII

PLACERVILLE, EL DORADO COUNTY, CALIFORNIA FRIDAY, AUGUST 13, 1937

NUMBER 189

### COACH ENTERED IN PARADE

Placerville Parlor, N. S. G. W.  
Will Send Vehicle To Gold  
Rush Fete At Sutter Creek

In addition to a delegation of members who will join with the parlor of Native Sons in Amador County to march in the parade Sunday morning at the Sutter Creek Gold Rush Jubilee, Placerville Parlor No. 9, N. S. G. W., will send its stage coach to take part as a float in the parade.

The coach and four horses will be driven by "Bud" Nichols, of Coon Hollow, who will have Louis Strickland, of El Dorado, as an armed guard beside him on the box.

Passengers in the coach will be Mr. Strickland's two daughters, Mrs. Otto Perschke and Mrs. Ola Shearer.

The Gold Rush jubilee is sponsored by the Sutter Creek Boosters Club and opens on Saturday. The parade will take place at 9:30 o'clock Sunday morning and will include, in addition to floats, stage coaches and other pioneer vehicles, a number of marching groups.

Native Sons who participate in the parade will wear blue overalls and a work shirt, with a soft felt hat as a uniform.

### Poison "Victim" Bigamy Suspect

Sacramentan Appears To Be  
Man Of Many Wives, Police  
Officials Reveal

SACRAMENTO—Captain of Detectives Alec McAllister announced early today that bigamy charges will be filed against Ed J. Jones, railroad employee, who two days ago caused the arrest of his bride of a fortnight, by telling police she had given him poisoned food. Jones, has confessed, according to police, that he married Mattie M. Bell of 1428 Seventh street, this city, on March 24, and then on August 4, in Auburn, married Mrs. Emily Doeltz, a widow, who has been held on his poison charges.

Police say Jones, also known as Arval Frank Duncan and Ed O'Neill, says he has another wife, Mrs. Mary Frazier, whom he married in Seattle a year or two ago.

Jones was taken ill on a train enroute to Ogden with his latest bride. Taken to the Mercy hospital he charged that he had eaten poisoned food prepared by his wife. He also charged that his bride's former husband, Merwyn Doeltz, San Leandro druggist, died of poison June 4. Police took Mrs. Jones into custody and started a rigid investigation.

When it was discovered that Doeltz had died a suicide from poison self-administered, Jones' charges against his bride back-fired. The authorities started an inquiry into the railroad man's antecedents and his various alleged wives began to come to light. Seattle authorities were asked last night to locate, if possible, Mrs. May Frazier Jones who seems to have been the first of the matrimonial string.

Contravening Jones' charges Mrs. Doeltz Jones offered a clear trail of her matrimonial experiences. Her first husband she said was a man named Foster of Los Angeles. She obtained an annulment of this marriage and married Doeltz.

Doeltz then killed himself and she married Jones in Auburn after a courtship of a week. Police believe that Jones, knowing of Doeltz's death by poison, plotted to throw his new wife under suspicion and then while her record was being investigated, to disappear. Hospital investigation of Jones' poison charges found no verification of the allegation that he had been poisoned.

Mrs. Mattie Bell Jones, one of Jones' wives, told police that she had loaned Jones considerable sums of money and that he left her when the money gave out. She said she had been searching for him for months in order to have the marriage annulled.

Ed Jones, who has been with the Pacific Telephone and Telegraph Company at Auburn, has recently been transferred to the Dunsmuir division. In a recent letter to his father, E. E. Jones, Ed reports he likes the work and was at that time looking forward to a visit to Crater Lake.

A QUARTER-MILLION-DOLLAR IMPROVEMENT promised during the ensuing biennium will realign U. S. Route 50 between El Dorado and Clark's Corners. Perhaps the major construction problem of the project will be through the Webber Creek section. Which is pictured above in a view taken from the air. This is one of the series of "map pictures" made for the Soil Conservation Service and turned over by that service to the El Dorado County Agricultural Conservation Association. The highway enters the bottom of the picture coming from El Dorado and may be traced through the many curves of Webber Creek toward the top of the picture, where it approaches Clark's Corners.

—A Democrat Engraving.

### TRAILER TWIN DIES IN MOTHER'S ARMS

Wife Of Itinerant Farm  
Worker Has Born 19 Babes  
Without Medical Aid

HOLLISTER—The giving of life is an old, old story to Mrs. Freeman Farmer, trailer wife of a migratory farm worker. Death, unfortunately, is almost as old a story to her.

Last Tuesday, Farmer proudly informed fellow fruit workers in a trailer camp here that his wife had just presented him with twins, a boy and a girl. They arrived two months too early, but each appeared lusty and full voiced. Mrs. Farmer named them Merle and Pearl.

The mother was unattended by doctor or nurse.

"We never bother with 'em," explained Farmer.

But, some hours after the birth, Pearl took ill. Then the father decided to consult a doctor, after all, and drove to the county hospital. Mrs. Anna Bow, the superintendent, received Pearl and placed her in an incubator.

Farmer headed his trailer, containing his wife and their eight other children, toward Merced in search of work. In the jolting and ramshackle home on wheels, Merle showed signs of illness. The little fellow's condition rapidly became worse, and Farmer finally turned about and headed back to the hospital.

Mrs. Bow found the mother cradling tiny Merle in her arms. She took the bundle and her face turned white. The son was dead.

The parents, each 38 years old, wept and consoled each other as they have done many times before. Mrs. Farmer tearfully confessed that she has borne 19 children, all without medical aid.

Nine of them are alive. Which explains why the trailer wife is on such familiar terms with the giving of life—and with death.

Mrs. G. E. Tuman of the Tuman mill at Sly Park, was a caller in the county seat on Wednesday.

### 3 SLOT MACHINES SEIZED; OWNER CITED TO APPEAR FOR HEARING

District Attorney Henry S. Lyon took a quiet drive to the Echo summit Thursday afternoon and searched several resorts for slot machines.

The investigation was in response to information that a Mr. McKelvey of Truckee, had installed several machines in this county.

Mr. Lyon reports finding three machines at Eagle Rock resort and these were confiscated. Beyond Eagle Rock, no machines were found and Mr. Lyon reports that he is led to believe that the excellence of the telephone service in the resort area probably was a contributing factor to the disappearance of some slot machines.

McKelvey has been cited to appear for a hearing on charges of owning the machines seized.

### MERCURY DROPS 2 DEGREES ON FRIDAY; 'TWA'S ONLY 104

Main street pedestrians complained of a slight "chill" on Friday, when it was learned the official maximum temperature was "only 104 degrees."

This was two degrees less than the highest temperature of the week to date, the 106 degrees officially reported on Thursday.

J. G. Leonardi, who has charge of the weather this week, while Adolph Martin is on vacation, reports that Wednesday's maximum was 105 degrees, with 101 on Tuesday and 98 on Monday.

But there were cool nights. Sunday night's minimum was 52 with one degree warmer on Monday night. Tuesday night it was 56, Wednesday, 59, and on Thursday, 59.

Thomas Maul and Joseph Quigley returned Thursday from a visit to San Diego. They drove to the Southland Monday and left San Diego Thursday morning at 6:30 o'clock, arriving home Thursday night, at 10:30 o'clock, covering a distance of 535 miles. They returned via Riverside and Bishop.

### SOVIET FLIERS FAIL TO ANSWER CALLS

Arctic Airmen Crossed North  
Pole About 3 A. M., Silence  
Fails To Cause Alarm

SAN FRANCISCO (U)—Twice a destination but never a landing place for trans-polar flights by Soviet airmen. San Francisco today awaited anxiously for reports on the success of the latest Russian Arctic dash.

Sigismund Levanevsky, one of the Soviet's most distinguished fliers, and five companions, had been unreported for six hours on their flight from Moscow to San Francisco.

Despite the prolonged silence, observers expressed confidence the six polar airmen are all right and pointed to the two previous polar flights and to the fact that these were made in single motored ships, whereas the plane now enroute is equipped with four motors.

It was thought possible that the failure of the fliers to respond to radio signals might be due to their being over a "dead" spot in the Arctic, from which it would be impossible to transmit by radio.

The plane was believed to have crossed the North Pole about 3 a. m. Friday.

### Balderston Babe Laid At Rest At Georgetown

The funeral services for Mark Ronald Balderston, son of Mr. and Mrs. George E. Balderston's station, were held on Friday afternoon at the graveside at Georgetown cemetery. Services were conducted by Memory Chapel. The babe was born on Wednesday last and weighed two pounds at birth. The child was taken to Sacramento and placed in an incubator in the hope that it might survive but death came early Thursday morning.

Mrs. Ruth Cook is visiting relatives and friends in and near Los Angeles.

C. C. Herbert, forest road superintendent, was in Desolation Valley on Friday.

### DR. LONG SUED FOR \$100,000 DAMAGE

5-Year-Old Son Of Alleged  
Abortion Victim Plaintiff  
In Action Filed Friday

SAN FRANCISCO (U)—The recent murder trial of Dr. Claude C. Long, his wife, Isabel, and Mrs. Ann Fisher, nurse, had a sequel today in the filing of a civil action for \$100,000 damages.

The plaintiff in the action is five-year-old Perry Arganbright, Jr., son of Mrs. Genevieve Arganbright, for whose death allegedly as the result of an illegal operation, the three defendants recently were tried. The trial resulted in a conviction against Dr. Long for manslaughter.

The complaint was filed by the boy's father, Perry Arganbright, on behalf of the son, and charges that the death of the wife and mother was due to neglect and failure on the part of the defendants to exercise the proper skill in the operation.

Dr. Long will come into court on August 20 for sentencing on the manslaughter conviction, at which time arguments will be heard on a motion in his behalf for a new trial.

### Hennessey May Succeed McPike

Nomination Sent To Senate  
For Confirmation; Hall  
Loses Out In L. A. Office

SAN FRANCISCO—Frank J. Hennessey, San Francisco attorney for 36 years, and a 30-year veteran of Democratic political campaigns, was nominated by President Roosevelt yesterday to succeed Henry H. McPike's expired post as United States Attorney for the northern district of California.

The nomination must be confirmed by the Senate.

McPike's appointment expired May 29.

At the same time the President suggested the name of Benjamin Harrison, San Bernardino county attorney, for the post of U. S. Attorney in the southern district, with headquarters in Los Angeles, to succeed Peirson Hall, whose term also has expired. In Hall's case the nomination followed strong pleas for his retention, and if Harrison's confirmation is forthcoming it is expected to lead to major realignments with the Democratic party that will have a bearing on both the gubernatorial and senatorial campaigns.

### MRS. AILEEN GERLE TAKEN BY DEATH SUDDENLY FRIDAY MORNING

Mrs. Aileen Gerle, widow of George Gerle, passed away very suddenly on Friday morning at the residence of her nephew on Pacific street.

She had not been well for some years past, although she was recently thought to be improving and was able to be downtown on Thursday, when she chatted in her usual happy mood with friends.

Mrs. Gerle is reported to have been born 57 years ago in Michigan.

She had made her home here for many years and was a member of the auxiliary to Placerville Aerie No. 889, F. O. E.

Funeral arrangements will be completed by Memory Chapel upon the arrival of relatives who are expected on Saturday.

### Turkey Gobbler Mothers Nest Of Goose Eggs

WEST CHESTER, Pa. (U)—A turkey gobbler with a "mother complex" has been discovered on a farm near here.

The gobbler has been conducting a "sit-down" on a nest of goose eggs, and it forcibly resisted all efforts to move him.

Once before it hatched out a brood of duck eggs, but he made no efforts at further mothering once they were hatched.

### Placerville Girl Passes Nursing Examination

Norma Bloom, daughter of Mr. and Mrs. Charles Bloom, has completed a nurse's training course at Sacramento County Hospital, passed the state examination and is now a registered nurse.

Miss Bloom is a graduate of El Dorado County high school.

### CITY SEWERAGE REPORT MADE

Congressman Englebright  
Wires Application Is  
Under Consideration

The entire PWA program is under consideration and Placerville's application for a PWA grant to assist in its proposed sewerage installation is included in the topics being deliberated upon, according to Congressman H. L. Englebright.

Englebright telegraphed City Attorney Thomas Maul to this effect on August 10, but Mr. Maul was out of the city and did not receive the message until Friday morning.

Mr. Maul gathered the impression, from the telegram, that probably the entire amount of money appropriated is being checked over with a view to allocations and expressed confidence Friday morning that some allocation may be made to Placerville for the sewerage project, although what amount of money this might represent, in comparison with the total cost of the project, was something Mr. Maul could not estimate.

### Midget Cruisers Have 7 In Crew

Britain Building Fleet Of  
Deadly Little Craft To  
Maintain Power On Sea

By ARTHUR N. SUVERKRUP  
United Press Staff Correspondent  
SAN DIEGO (U)—Speedy, deadly "baby-battleships," carrying a crew of only seven officers and men, have been developed by Great Britain to aid in maintaining her position as "mistress of the seas."

This was revealed by officers of H. M. S. Exeter, which stopped here for a few days, while enroute to Vancouver, B. C.

The new type warcraft is capable of extremely high speeds, the officers said.

While considerable reluctance was shown by His Majesty's officers, when it came to discussion of technical details of the deadly little fighters, it was pointed out the craft will maintain speeds of 45 land miles an hour.

Each carries at least two torpedo tubes, and mounts several heavy caliber machine guns. Each also is equipped to carry depth bombs to combat submarines.

### WHITE ROCK SCENE OF FATAL AUTO WRECK THURSDAY NIGHT; ONE KILLED

FOLSOM—Fred Richardson, 25, an assistant chemist in the Mare Island navy yard, was killed Thursday night when the auto in which he was riding with John P. Dooley, also of Vallejo, overturned at the White Rock train crossing near here. Dooley escaped with cuts and bruises.

The two men, on a fishing trip to Desolation Valley near Lake Tahoe, failed to negotiate a turn.

The auto overturned, pinning both men under it. Passing motorists extricated them.

Richardson is survived by a sister, Mrs. Viola Wilson of Vallejo.

## THE TIE THAT BINDS

**FATAL**—Clouds of smoke pour from this spectacular accident that occurred on a highway near Akron, Ohio, when a transport truck with a cargo of four new automobiles was in collision with a car driven by Henry C. Moles of Lorain. The truck was en route from Lansing, Mich., to Pittsburgh. Moles died of burns, but the truck driver managed to escape.

## 750,000 YEAR OLD SKULL OF MAN FOUND IN CAVE AT PEKING, CHINA

SAN FRANCISCO (U.P.)—Dr. Ralph Chaney of the University of California and the Carnegie Institute, has announced that the skull of a "Peking man," believed to be 750,000 years old, had been discovered in a limestone cave near Peking.

"The skull was the first complete one of its kind ever discovered," Dr. Chaney said, "and is a priceless treasure of inestimable value to the scientific world."

He described the skull as being almost completely intact and containing six teeth. If further study bears out present conclusions it will furnish science with its oldest relic of a race of semi-humans, long since wiped off the earth, he said.

The skull was found July 6 by Dr. Franz Weidenreich, director of the research laboratory of Cenezoic in Peking. Scientists working with this laboratory have been concentrating their work in the Peking area for years and found several partial skulls previously.

## "SQUAWKER" FISH

POTTERSVILLE, Mo. (U.P.)—C. R. Leslie said after a fishing trip that the James River abounds in "squawker" catfish that "squawk" when the hooks is extracted. They average seven inches in length and can be heard 100 feet.

## Old Fortress Monastery To Become Island

MONT SAINT MICHEL, France (U.P.)—The famous fortress monastery of Mont Saint Michel, which has been joined to the mainland by a dike, will become an island again, according to an announcement by the Ministry of Public Works.

The work of cutting the dike for a distance of 1,700 feet will begin early in 1938. Those in charge believe that the work will be completed in time for the festival of Mont Saint Michel in September of next year.

At present tourists may visit the historic monument by motor car, but when the dike is cut it will be separated from the mainland.

## Let Refrigerator Freeze Desserts In Hot Weather

By JUDITH WILSON

ND now come the Dog Days of the year! Why do they call them Dog Days? One story is that the Dog Star, Sirius, is in the ascendency, but we suspect that it is the time of the year when we like to lie around and not do much of anything—just like the family pooch.

**LUNCHEON**  
 Scrambled Eggs, Western Style  
 Hot Biscuits Jelly  
 Grapefruit-Raspberry Mold  
 with Cream Mayonnaise  
 Fruit Cookies Coffee

**DINNER**  
 Lime Punch Cup with  
 Mint Garnish  
 Broiled Spring Chicken  
 Grilled Tomatoes  
 Buttered Lima Beans  
 Stuffed Celery  
 Apricot-Banana Mousse  
 Coffee

You will have plenty of time for leisure activities if you plan menus that can be cooked in a hurry and let the refrigerator do most of your work for you. The following are easy to do and cool to consume.

**LIME PUNCH CUP**  
 1 package lime-flavored gelatin  
 1 cup hot water  
 1/2 cup canned grapefruit juice  
 1/2 cup canned pineapple juice  
 Dissolve the gelatin in the hot water, add the fruit juices and turn into a shallow pan. Chill until firm, cut in cubes and pile in

low cups or sherbet glasses. Garnish with segments of grapefruit or with fresh pineapple cubes and garnish with leaves of fresh mint. If you want to make this appetizer extra attractive, set the cups or glasses in which you serve it in bowls of chipped ice.

**BANANA-APRICOT MOUSSE**  
 3/4 cup apricot pulp  
 1 cup mashed banana  
 3 tablespoons lemon juice  
 1/3 cup apricot juice  
 1/3 cup confectioner's sugar  
 1/4 teaspoon salt  
 1 cup cream, whipped  
 Press stewed or canned apricots through a sieve and add to mashed banana. Add the lemon juice, apricot juice, sugar and salt and mix well. Fold in the whipped cream. Freeze in an automatic refrigerator or pack in salt and ice until firm. Thin, crisp butterscotch-nut cookies go well with this. Keep the servings small as this is a very rich dessert.

**WESTERN SCRAMBLED EGGS**  
 3 tablespoons light cream  
 6 eggs  
 2 tablespoons butter  
 1/2 cup chopped boiled ham  
 1/4 cup finely chopped onions  
 1/4 cup chopped green pepper  
 Salt  
 Pepper  
 Melt the butter, add the pepper, onion and ham and saute slowly for 2 minutes. Break the eggs into a bowl, add the cream and salt and pepper to taste and beat with a fork. Pour into the frying pan and cook, stirring slowly until the eggs are soft and creamy. Serve immediately on slices of buttered toast.

## BRONCHO BILL

A Trouble Maker

By Harry F. O'Neill

## STATE OF CALIFORNIA CHIEF LANDLORD, CONTROLLER'S SURVEY SHOWS

SACRAMENTO—The State of California is the chief landlord of the state.

More than two million acres of land once owned by private individuals has reverted to the state for non-payment of taxes, a survey made by State Controller Harry B. Riley, shows. There is also in excess of one hundred thousand city lots, both improved and unimproved, which the state now owns.

A large amount went to the treasuries of the cities and counties, which receive the money paid to redeem land from tax sales. The lion's share of redemption money went to Los Angeles County, about \$2,500,000, said Controller Riley. Several times this amount will ultimately be received by the counties, as most redemptions are made on the ten payment plan. This permits redemptions by paying one-tenth of delinquent taxes, and all current taxes, to be paid each year.

Land on which taxes remain unpaid is "sold to the state" the first four years, then deeded to the state when taxes are unpaid for the fifth successive year. Administration of tax deeded land has been vested in the controller since 1870.

In 1928, a normal year, there were one hundred and seventy-five thousand sales to the state and twenty thousand deeds to the state; in 1932 this increased to three hundred and twenty-one thousand sales and fifty-five thousand deeds; this year it dropped to one hundred and seventy-eight thousand sales but deeds to the state for land lost in depression years rose to seventy thousand.

Redemptions have shown a 25 per cent increase in the last year, Controller Riley stated. Agents of the controller in charge of leasing tax deeded lands report that as many as seven out of every ten parcels investigated are redeemed by their former owners. The state does not want the land, Riley emphasized, and assists owners wherever possible. The sole interest of the state, he said, is to restore this property to tax rolls for local taxation.

Cities and counties last year received from redemptions, as a result of the controller's investigations: Imperial \$6,600; Orange \$6,000; Los Angeles \$2,500,000; Kern \$1,000; Dinuba, Tulare County \$4,000; Sacramento \$1,700; total \$2,519,300.

Controller Riley pointed out that the owner can redeem his land after the deed to the state, and urges owners not to part with their title without investigating their rights.

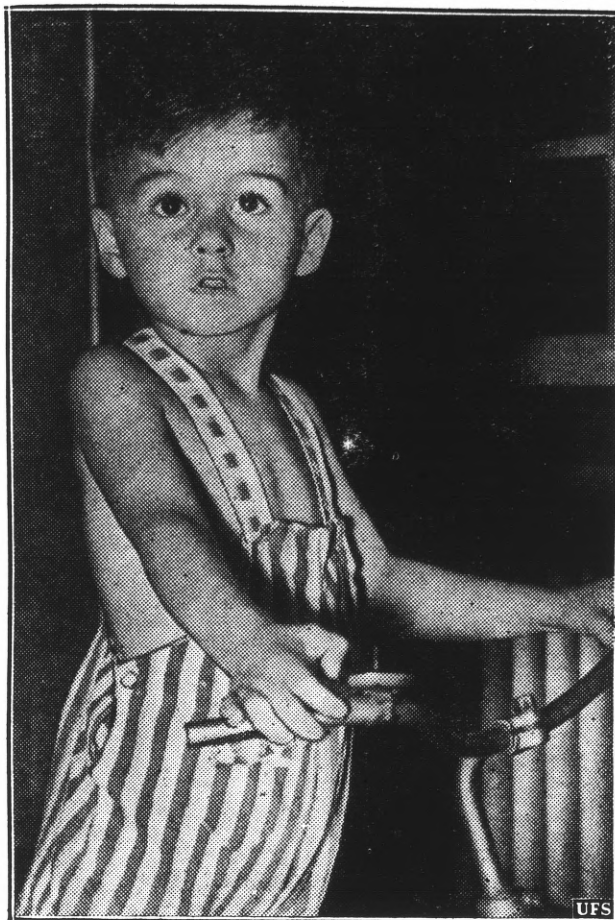

## "Live Boiled" Lobsters Demanded By Tourist

ORRS ISLAND, Me. (U)—A visitor asked lobsterman John Johnson for "six live boiled" lobsters.

Johnson went to his traps and produced the lobsters saying the customer would have to boil them himself. Indignantly the purchaser walked away and said, "I told you I wanted them alive, but all boiled."

Forest Supervisor Edwin F. Smith returned to his desk Friday following several days in the field.

**PAWN IN PARENTAL TANGLE**—While a parental battle raged around him, Donald Horst, 2½ years old, speculatively considered the cameraman who took this picture of him at the St. Vincent's Orphanage in Chicago. The boy's foster parents, Mr. and Mrs. Otto Horst, have started a legal fight to regain custody of him. He was recently abducted from them by Mr. and Mrs. John Regan, his natural parents.

## "BUSINESS GIRLS" HAVE BEST CHANCE TO BE SUCCESSFUL AS BRIDES; "STAY-AT-HOME" POOREST, SURVEY BY CORNELL UNIVERSITY SHOWS

ITHACA, N. Y. (U)—Contrary to the advice of love-lorn experts, girls who have jobs before marriage are more likely to enjoy a successful wedded life than those who do not work, according to studies of the department of rural social organization at Cornell University.

The only exceptions are women who, before marriage, were very active in community affairs or who were responsible housekeepers in their own homes, the study revealed.

Facts for the study were given by 526 couples who were married from two to six years. The couples were divided into groups, whose marriages were well adjusted, moderately adjusted, and poorly adjusted.

Among the other facts the study brought out:

The poorest bet of all is the girl who, after finishing school, stays at home with no responsibilities either in the home or on a job, or in a community.

Husbands and wives who have similar social and cultural backgrounds are more likely to be more successful in marriage than those with very different backgrounds.

Husbands who have a record of regular employment and a stable interest in their jobs are one and one-half times more likely to have a well-adjusted marriage. Those who earn at least \$150

a month at the time of marriage have slightly better chances of success in marriage.

Husbands who have some savings, say between \$500 and \$1,000, at the time of marriage, are better bets than those with no savings. More important than the actual amount saved is a consistent policy of saving.

## Sulphite Pulp Waste Used As Dressing For Roads

VANCOUVER, B. C. (U)—American chemists have discovered a method of building roads from trees, Dr. H. K. Benson, of the University of Washington department of chemical engineering, revealed in a paper before the Canadian Chemical Association convention here.

The sulphite pulp industry of the United States and Canada is wasting 2,000,000 tons annually in sulphite waste liquor, for which uses are only now beginning to be found. One of these uses is in binding the soil which constitutes the vast majority of dirt secondary roads in both countries.

More than 2,000 miles of highway and streets in Eastern Washington have been treated with unadulterated waste liquor from the pulp mills of the state, he said, and the liquor has been found superior to oil for this purpose.

## HEAVIER RAILS PAVE WAY FOR STREAMLINERS; WEIGHT 112 POUNDS PER YARD

A lot of steel has passed under the wheels every time you hear the frequent "click" which is a traditional part of railroad travel.

With heavy modern rails now in use on all main lines, every set of clicks means that the wheels have passed over from 1400 to 1700 pounds of steel, according to Southern Pacific.

In 1869 the first transcontinental railroad was laid with rails weighing only 50 pounds per yard. These continued to be standard as late as 1933. But as train speeds began to increase and equipment became larger and heavier, the need for heavier rails became apparent.

Since that time the weight per yard has been consistently increased until today rails on straight track are ordinarily 112 pounds per yard, and on curves, 131 pounds per yard. The old 50-pound rails weighed only 88 tons per mile of track, in contrast to over 197 tons for the modern 112-pound rail, and over 230 tons per mile for the 131-pound rail.

Today's heavy rails, Southern Pacific points out, are largely responsible for the top notch safety record of Class 1 railroads which has been maintained even though modern streamliners now travel at speeds around 100 miles an hour and all other types of trains move on greatly accelerated schedules.

Supervisor Charles Green was in town from Diamond Springs Friday morning.

**SOCKED**—Sheridan Fahnestock, 23, New Yorker, who was beaten over the head by Japanese soldiers in Peiping, China, when he attempted to photograph a cheering crowd of Japanese near the Italian Embassy. He is on a three-year cruise around the world.

## Pied Piper Routs Rats, Marksmen Are Iried

CHAPEL HILL, N. C. (U)—Three marksmen who tested their skill by shooting rats at the city garbage dump bemoaned today the installation of an incinerator and the work of a professional rat killer who poisoned the rodents.

E. A. Brown, Arline Carawan and Obie Davis, the marksmen, said sometimes they killed as high as 100 rats each at an afternoon's shoot.

## DEEP-SEA DIVERS LOCATE OIL RESERVES OFF LOUISIANA

NEW ORLEANS (U)—Deep sea divers are prospectors in the latest oil rush.

Equipped with gigantic drilling barges developed especially for underwater exploration, operators are tapping pools of black gold lying thousands of feet beneath the ocean's bottom. Nine of Louisiana's great oil-producing fields are now situated in marshes skirting the open gulf and in the gulf itself.

Leaseholds in land covered with hundreds of feet of water are at a premium. The newest salt dome believed to harbor oil lies 18 miles out in the Gulf.

Louisiana is particularly fortunate, since public domain over water bottoms has made the state probably the largest owner of oil lands in the South, according to Governor Richard W. Leche.

In developing new drilling techniques for the underwater work, operators have mounted derricks, boiler houses and other necessary equipment on specially constructed barges, air- and water-tight, which may be sunk and raised at will.

## TYPEWRITERS \$3

CLEVELAND (U)—Before 16 of 36 stolen typewriters were recovered here, police learned that their purloiners had sold most of the machines to merchants in suburban Garfield Heights for as little as \$3 each, reciting that they wanted money to repair their truck.

### Man Takes Castor Oil In Lieu Of \$100 Fine

GENEVA, Ohio. (UP)—Justice of the Peace L. E. Evans gave the alternative of \$100 fine or a dose of castor oil, to a man arrested for hiring a taxi when unable to pay the fare.

The man had been under the influence of liquor when arrested.

Evans let him go on the merit of taking the oil without protest.

### EDITH WHARTON, NOVELIST, CLAIMED BY DEATH IN FRANCE

PARIS (UP)—Edith Wharton, American novelist, died yesterday at Chateau Brice Sur Foret, near here.

Mrs. Wharton attained immediate recognition with her first serious novel, "The House of Mirth," in 1905. She was known principally as a chronicler of the social activities of the Mauve decade, although her somber study of New England frustration, "Ethan Frome," won her wide approval. This work was made into a recent play.

She was born Edith Newbold Jones, daughter of a wealthy family, in New York on January 24, 1862. She was reared among that select circle of New Yorkers whose children were attended by French, Italian and German governesses.

At 23 she was married to Edward Wharton, a Boston banker. Four years later her first published works, a sonnet and a short story, appeared and she continued writing between frequent European trips and sojourns in New York, Newport and Lenox. Her first novel, "The Valley of Decision," was published in 1902.

### 500 Automobiles Will Race Around Australia

SYDNEY (UP)—It is expected that 500 motor cars will compete in the 10,000-mile round Australia race, which is to be a feature of Australia's 150th anniversary celebrations next year. In many places the route will follow primitive bush tracks where even wheel marks will be difficult to distinguish.

### NEW TYPE MARIMBA

CLARKSDALE, Miss. (UP)—Equipped with Honduras rosewood, J. G. Faulkner of Helena, today worked on a marimba which he predicts will be superior to those manufactured in the tropics. The wood was obtained by Faulkner after a long search.

### Custom-Built Bed For Dog Has Mattress, Springs

DUPREE, S. D. (UP)—Visitors viewed a bed ordered from Jake Maca, local cabinet-maker, by an unnamed Black Hills woman.

The visitors thought it was a "beautiful piece of work—but a bit small for a bed."

The cabinet-maker explained the woman had ordered the bed, complete with inner-spring mattresses and springs, for her pet bulldog. It is valued at \$150.

### BLACK'S NOMINATION TO SUPREME COURT GAINS ENDORSEMENT

WASHINGTON (UP)—While a subcommittee of the Senate judiciary committee today recommended approval of the nomination of the nomination of Senator Hugo Black to succeed Associate Justice Willis Van Devanter in the Supreme Court, it appeared there is little possibility of action by the committee as a whole until Monday.

Senator Henry Ashurst, Arizona, chairman of the judiciary committee, indicated he will not call a special meeting of the committee to consider the nomination. This would mean that action on the nomination will come before the committee at its regular meeting on Monday.

Meanwhile, administration supporters in the Senate hailed the subcommittee action as a herald of ultimate approval of the nomination, while foes of the President' judiciary revision program were reported as endeavoring to block approval of the nomination.

T. L. McHale returned to work Friday at his watch repair shop. The shop was closed Wednesday, while Mr. McHale was at San Francisco, and Thursday, as a result of McHale's injury in an auto accident while returning home Wednesday night. McHale was getting about Friday with difficulty.

### YANKEE LOVE OF SPEED HELD RESPONSIBLE FOR MANY AUTO ACCIDENTS

STATE COLLEGE, Pa. (UP)—The American motorist's love of speed is the greatest factor in the cause of automobile accidents and their resulting fatalities, according to Prof. Amos E. Neyhart of the Pennsylvania State College extension service.

But Prof. Neyhart, who has charge of the driver training program for the American Automobile Association, does not attribute these accidents to excessive speed. Rather he believes they originate in operating cars too fast for driving conditions—which may even be

### PIGEONS CARRY MAIL

BOURNE, Mass. (UP)—Peter H. Santoro, a 16-year-old National Guard camper, can't wait for the U. S. mails to deliver his letters to his Norwood home—so he uses carrier pigeons. It takes the bird about an hour to cover the 60-mile distance.

leisurely gaits of 15 or 20 miles an hour.

These are some of the things thirty high school teachers are learning at Prof. Neyhart's safe driving course at Penn State. When the school year begins in the fall, these teachers will have a complete set of material with which to teach safe operation of motor cars to be found in the United States.
